

Strat With Active Pickups Wiring Diagram And Range Hood Wiring Diagram By XPMissions

Strat with active pickups wiring diagram and range hood wiring diagram

bartolini PICKUPS AND ELECTRONICS AG2PB/918

Adjustable Gain Dual Piezo Buffer/Preamp for +9V or +18V operation

This diagram shows one way to connect an AG2PB to an NTMB+F 3-band EQ in order to isolate the two pickups from each other and balance their levels with the 2 independent piezo buffers while maintaining a flat frequency response.

The negative side of the battery(ies) should be connected to the jack ring so that power is turned on only when the plug is in. Unplug the instrument when not in use to conserve your battery.

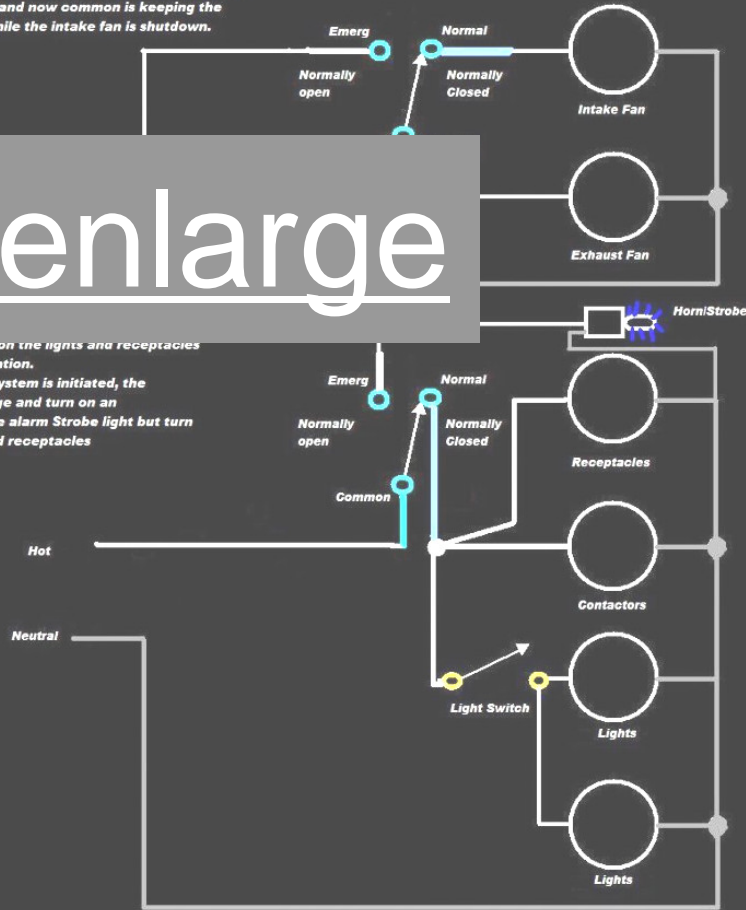

This Sample wiring diagram is not meant to represent what is included with the AG2PB or NTMB, but is only one suggestion of how they may be used in an instrument with 2 piezo pickups. See the product page for details.

Ordering Details: <https://bartolini.net/product/ag2p/>

Model/SKU	Description	UPC
AG2PB/918	Buffer, Adjustable Gain, Dual Channel, 9 or 18V for Piezo Pickups	682384502907
HR-5.0/918	Band NTMB+F Preamp, Pre wired with 5 Pots: (Volume) (Blend) (Treble) (Mid) (Bass) All Bartolini active pre-wired harnesses maybe used in place of the HR-5.0 and will be wired similarly.	682384504680

DO NOT USE MORE THAN 18 VOLT SUPPLY VOLTAGE OR EXTERNAL POWER SUPPLIES

The Intake and Exhaust fans are both on in normal operations.
You can see when the fire system is initiated that the contacts change and now common is keeping the Exhaust fan on while the intake fan is shutdown.

here, power is on the lights and receptacles in normal operation.
When the fire system is initiated, the contacts change and turn on an optional remote alarm Strobe light but turn off all lights and receptacles
